📄 G10 & World Impact — Recession Intelligence

Real-time recession status, GDP trajectory, forex impact, and policy response for every G10 economy. Click any country for a full drill-down with Chart.js time series spanning 2008, 2020, and the 2025 forecast scenario.

CAPABILITIES

What's Inside the Platform

Every module is built on free, verifiable, primary-source data. Every source is cited and clickable. Every figure can be traced back to IMF, World Bank, BIS, Fed, or OECD publications.

Recession Intelligence

Historical atlas (1929–2024), Global Radar 2025, Forecast 2025–2040 with 4 macro scenarios, G10 country deep-dives, sector rotation, forex impact, and trader playbooks.

Ultra-Advanced

Rising Powers Intelligence

15+ ascending and neutral nations tracked with AI Oracle analysis, Power Race cards, Next China, Future Migration, Passport Power, New Nations, and Future Currencies.

Geopolitical

World Map & Geopolitics

Interactive Leaflet.js map with alliance overlays, population density, geopolitical risk layers, and a Future Geopolitics sub-tab for 2030-2050 scenario modelling.

Interactive

Forex & Safe Haven Analysis

10 major currency pairs with recession behaviour: USD/DXY, JPY, CHF, Gold, GBP, EUR, AUD, EM FX. Historical move data from BIS and Fed. Visual bar chart comparison.

Traders

Markets & Crypto

Live CoinGecko crypto prices, global stock exchange tracker (NYSE, Nasdaq, LSE, DAX, TSE, Shanghai), real-time market AI pulse, and per-asset AI analysis.

Live Data

Environment & Climate

Real-time AQI for 500+ cities via OpenAQ, top-10 most polluted/cleanest rankings, city comparison chart, and deforestation tracker with satellite data citations.

ESG

Global News Intelligence

10 parallel live news tabs (World, Markets, Environment, Geopolitics, Middle East, Asia, Europe, Americas, Tech) with BBC, Reuters, Al Jazeera, DW. Auto-refresh 90s.

Live

AI Analysis Engine

On-demand MiniMax M2.7 AI synthesis across every major module. Generates intelligence summaries, scenario analysis, forex forecasts, and trading signals — all free.

PROFESSIONAL USE CASES

Where This Platform Delivers Value

Built for intelligence professionals across investment management, consulting, research, and policy — where speed and source credibility matter equally.

▣ Investment Management & Trading Desks

Portfolio managers use the G10 Recession Radar and Forex panel to position ahead of central bank pivots. The STRONG/MODERATE/WATCH trader setup ratings replace hours of manual research.

▣ Macro Research & Strategy Teams

Analysts use the Historical Atlas and 2025–2040 Forecast scenarios to produce country risk memos and sector rotation models. Every source is cited and clickable — audit-ready.

▣ Management Consulting Firms

Consultants use Rising Powers and World Map modules to brief clients on geopolitical risk and supply chain exposure — replacing \$24,000/yr Bloomberg subscriptions for qualitative briefings.

📁 Country Risk & Sovereign Advisory

Risk analysts use the G10 deep-dive modals and Developed vs. Developing comparison to model contagion risk, debt sustainability, and currency crisis probability across 40+ countries.

🌱 ESG & Sustainability Research

The Environment module provides real-time AQI, deforestation rates, and climate data for ESG scoring, country-level sustainability assessments, and regulatory compliance reporting.

📁 Government & Policy Research

Policy researchers use the Recession Intelligence and Rising Powers modules for structured, source-cited briefings, economic scenario planning, and budget stress-testing exercises.

COMPETITIVE ADVANTAGE

Why Firms Using This Platform Win

This platform replaces tools that cost tens of thousands of dollars per year — without compromising on source quality or analytical depth.

📁 WITHOUT THIS PLATFORM

4-6 hours researching IMF, OECD, BIS separately

📁 WITH THIS PLATFORM

All 27+ sources unified in one dashboard, loaded in seconds

WITHOUT THIS PLATFORM	WITH THIS PLATFORM
\$24,000+/yr Bloomberg or Refinitiv subscription	Free, open, always updated — zero vendor dependency
Manual sector rotation analysis using Excel	14-sector cards with historical %, reasoning, and recovery order
Static PDF country risk memos, months out of date	Live G10 drill-downs with policy response, forex impact, green signals
Generic recession playbooks with no trade ratings	Structured setups rated STRONG / MODERATE / WATCH
Junior analyst research taking 3–5 business days	Senior-grade intelligence synthesis in under 60 seconds
No AI layer — all analysis is manual	MiniMax M2.7 on-demand AI in every major module
News monitored reactively via email alerts	10 parallel live news tabs, auto-refresh every 90 seconds

TECHNOLOGY

Built to Last. Zero Dependencies.

A single HTML file with no build step, no backend, no framework, and no subscription — yet it outperforms most enterprise intelligence dashboards.
