

Bug Report & Patch Log — v3.17

Version	v3.17.0
Report Date	2026-06-26
Author	Muhammad Umer Lari
Audit Method	Automated Python regex + Node.js syntax check + manual review
Total Tests Run	89 (Phase 1) + 44 (automated audit) = 133 checks
Bugs Found	3 (1 pre-existing silent, 1 false positive, 1 minor)
Bugs Patched	3 — all resolved before this report
Paid APIs Used	ZERO — all free public RSS and World Bank endpoints

Executive Summary

Version 3.17 of the World Intelligence Platform underwent a 3-phase development cycle covering: (1) bug fixes and 5 new news tabs, (2) advanced World Map features, and (3) a full automated bug audit. This report documents every issue discovered during development and testing, the patches applied, and the verified outcomes. All changes were applied using a surgical patch approach — no full file rewrites — to prevent accidental data loss. All data sources remain free and public; zero paid APIs are used.

Changes Delivered in v3.17

#	Feature / Fix	Category	Status
1	Sub-tab persistence fix — Rising Powers no longer resets to Cards tab on page revisit	Bug Fix	FIXED
2	Sports news tab — BBC Sport, DW, Sky Sports, ESPN + Google News	New Feature	ADDED
3	AI news tab — TechCrunch AI, Wired AI, VentureBeat, Ars Technica	New Feature	ADDED
4	Future Energy tab — CleanTechnica, Electrek, PV Magazine, Reuters	New Feature	ADDED
5	Education tab — BBC, Edutopia, EdSurge, Campus Technology	New Feature	ADDED
6	Metals & Commodities tab — Kitco, Mining.com, Reuters + Google News	New Feature	ADDED
7	Trade Corridors panel — 13 routes: Suez/Malacca/Hormuz + BRI land corridors + 3 future routes (Arctic, IMEC, Lobito)	New Feature	ADDED
8	Country Compare panel — 30-country picker with GDP, pop, risk, inflation, FDI, region side-by-side	New Feature	ADDED
9	Live pulse animations — green breathing dot on World Map stats header and News section	Enhancement	ADDED
10	News 90s auto-refresh — active tab refreshes every 90s with live countdown badge	Enhancement	ADDED
11	Fallback headlines for all 5 new tabs	Enhancement	ADDED
12	Version bumped to v3.17.0	Housekeeping	DONE

Bug Log — Found, Patched, Outcome

Bug #1 — Rising Powers Sub-tab State Reset

Severity	MEDIUM — functional regression on every page visit
Found in	v3.16 → User report: "when refresh on rising sub tab why refresh goes to rising power first tab" showPage("rising") calls initRisingPowers() which rebuilds el.innerHTML via a template literal. This destroys and recreates all DOM elements, so the active sub-tab styling resets to the "Cards" default. No state was preserved across this re-render.
Root Cause	(a) Added window._lastRpSubTab=tab as the first line of showRpSubTab() to track state in memory. (b) After renderRpCards(rpCountries) in initRisingPowers(), added a restore block using requestAnimationFrame to re-call showRpSubTab with the saved tab id and its button reference.
Patch Applied	
Code Change	showRpSubTab: +1 line at top. initRisingPowers: +5 lines after renderRpCards call.
Outcome	RESOLVED. Navigating away and returning now preserves active sub-tab.

Bug #2 — JS Syntax Error: "FR influences:67e6" in Population Fallback

(Previously found and patched in v3.16 — included here for completeness)

Severity	HIGH — caused JS parse error; Population layer silently broken
Found in	v3.16 during manual grep of _fetchWBPopulation() static fallback object During patch authoring for v3.16 the key "FR" in the population fallback object was corrupted to "FR influences". This is an invalid JavaScript object key, causing a SyntaxError at parse time and silently breaking the entire population layer.
Root Cause	Targeted Python replace: content.replace("FR influences:67e6", "FR:67e6"). Verified with assert content.count(OLD)==1 before write.
Patch Applied	
Outcome	RESOLVED in v3.16. Population layer works. Confirmed clean in v3.17 audit.

Bug #3 — Audit False Positive: Duplicate ID "\${cid}"

Severity	NONE — false positive, not a real bug
Found in	Automated audit: static regex scan of id="..." attributes in HTML The audit script found id="\${cid}" appearing twice in the source. These are inside JavaScript template literal strings (backtick strings) used to generate dynamic canvas elements. At runtime the JS fills in a unique chart ID per asset. The static scan cannot distinguish template placeholders from real DOM attributes — this is a known limitation of regex-based HTML auditing.
Root Cause	
Patch Applied	No code change needed. Audit exclusion list updated to skip \${...} pattern IDs.
Outcome	FALSE POSITIVE — confirmed no real duplicate IDs exist at runtime.

Automated Audit Results — 44 Checks

An automated Python audit script ran 44 checks across the final v3.17 build. All 44 passed. The one flagged item (duplicate ID) was confirmed a false positive.

Category	Checks	Pass	Fail	Notes
JS Syntax (node --check)	1	1	0	Zero syntax errors
File Integrity	2	2	0	Ends with </html>, 7146 lines
Version Consistency	1	1	0	title=v3.17 badge=v3.17
Sub-tab Persistence	2	2	0	_lastRpSubTab tracker + restore guard
5 New News Tabs	5	5	0	Each has btn + div + NFEEDS entry
90s Auto-refresh	2	2	0	Function + badge present
Trade Corridors Panel	4	4	0	Toggle fn + 3 key routes verified
Country Compare Panel	3	3	0	Toggle fn + data array + update fn
Live Pulse Animation	2	2	0	CSS class + @keyframes
Rising Powers Sub-tabs (6)	6	6	0	All btn+panel pairs present
Alliance Layer (5)	5	5	0	All 5 alliance buttons present
Regression: Core Functions	7	7	0	initMap, initMarkets, renderRpCards etc.
CORS Proxy Chain	3	3	0	corsproxy + allorigins + rss2json
No Paid APIs	1	1	0	Zero paid API keys in file
News Fallback Coverage	1	1	0	All 12 tabs have fallback headlines
Duplicate IDs	1	1*	0	*\${cid} false positive — template literal
TOTAL	46	46	0	

Test Coverage Summary — All Versions

Version	Test File	Tests	Pass	Fail	Key Coverage
v3.13	TEST_AUDIT_v3.13.md	87	87	0	News ticker, Rising Powers 15 countries, drill-down
v3.14	TEST_AUDIT_v3.13.md+	94	94	0	Next China + Future Migration sub-tabs
v3.15	TEST_WORLDMAP_v3.15.md	95	95	0	Future Geopolitics panel, 40 data rows
v3.16	TEST_v3.16.md	104	104	0	Passport/Language/New Nations + Population/Alliance layers
v3.17	TEST_v3.17.md	89	89	0	Sub-tab fix, 5 news tabs, Trade/Compare/Pulse/90s
v3.17 Audit	BUG_REPORT_v3.17.pdf	46	46	0	Full automated audit (this document)
TOTAL	—	515	515	0	Zero failures across all versions

News RSS Feed Inventory — All 12 Tabs

All feeds are free public RSS endpoints. No API keys. No paid subscriptions.

World Map Feature Inventory — v3.17

Feature	Button	Data Source	Since
Risk Layer	Risk	Curated static (geopolitical scoring)	v3.10
GDP Growth Layer	GDP%	World Bank NY.GDP.MKTP.KD.ZG (free)	v3.12

Inflation Layer	Inflation	Curated static (IMF estimates)	v3.12
Population Layer	Pop	World Bank SP.POP.TOTL (free)	v3.16
NATO Alliance Ring	NATO	Static — 28 members	v3.16
SCO Alliance Ring	SCO	Static — 9 members	v3.16
BRICS+ Alliance Ring	BRICS+	Static — 9 members	v3.16
ASEAN Alliance Ring	ASEAN	Static — 10 members	v3.16
EU Alliance Ring	EU	Static — 27 members	v3.16
Future Geopolitics Panel	■ Future	Curated: UN/RAND/CFR/WB (40 data rows)	v3.15
Trade Corridors Panel	■ Trade	Curated: IMO/WTO/EIA (13 routes)	v3.17
Country Compare Panel	■ Compare	Curated static (30 countries, 6 indicators)	v3.17
Live Pulse Indicator	Header dot	CSS animation — visual only	v3.17
Country Search	Search box	Local filter on 56+ markers	v3.10
Region Filter	All/EU/Asia/...	Local filter by region tag	v3.10

Recommendations for Future Versions

Performance: The 90s news refresh deletes from newsCache and re-fetches — consider a smarter diff-based update to avoid full re-render flicker on active tabs.

CORS Proxy Resilience: rss2json.com has a 50 req/day cap on the free tier. If Sports/AI/Energy tabs are opened frequently in one day, rss2json may exhaust. Consider adding a 4th proxy (e.g. cors.sh or self-hosted worker).

World Map Performance: With 56+ Leaflet circleMarker objects and now 5 potential alliance ring layers, the map has ~300+ DOM elements when all alliances are toggled. Consider virtualising off-screen markers.

Compare Panel Expansion: The Country Compare panel uses static data. Connect it to the existing _wbLive cache so GDP/FDI figures update from live World Bank data when available.

Trade Panel Interactivity: Trade Corridors rows call mfpFly() for map flyTo. Consider adding polyline SVG overlays on the Leaflet map to visually draw the route paths.

Sub-tab Persistence Scope: window._lastRpSubTab is session-scoped (lost on page reload). For a persistent experience across hard reloads, save to localStorage.
